“INTO THE BLUE LAGOON”

Fiji

Sailing out northwest from the main island of Viti Levu brings you to the Yasawa Island Group made famous by the movie Blue Lagoon.

You will be awed by natural beauty, world class high visibility diving and breathtaking beaches. Sunny, unique and unspoiled, Fiji lies between 15° and 22° south of the equator and has over 330 islands with miles of pristine white sandy beaches, fabulous coral gardens and verdant tropical rainforests that cling to mountains which were volcanic in origin. The islands are a fascinating blend of cultures and colour and have something to offer all yacht visitors.

INTO THE BLUE LAGOON

Sailing out northwest from the main island of Viti Levu brings you to the Yasawa Island Group made famous by the movie Blue Lagoon. You will be awed by natural beauty, world class high visibility diving and breathtaking beaches. With an infusion of native Fijian heritage mixed with Indian, Chinese and European settlement, the cuisine has a large dash of culinary panache. You'll be moved by the sight and sound of the Islanders singing and dancing their way through a Meke, and especially by the haunting Fijian farewell 'isa lei'.
